For some reason I just ran into this bug in Left4Dead 2 - luckily the fix was pretty simple - I just needed to install Left 4 Dead 2 Extra Support. Click the right button on the Steam icon in the system tray and click on the library. Now click on the Tools link. Look for Left 4 Dead 2 Additional support on the list. If it's not installed, just install it. If the installation is not complete, click on it and then select Delete local content and then reinstall it. Thanks to Goathief on the Steam forums for fixes. People who play Counter Strike on servers many times may have encountered a bad file server providing a consistency of the files error. One way to get rid of this is that you can use different servers because not all servers have a check of the consistency of the files included. The second method is that you need to delete old sprite files, so the next time you connect the CS server after the Counter Strike sprites are removed, you will automatically download new sprites. Error: Disabled: You have been disconnected from the server. Reason: Bad File Server provides file consistency for sprites/muzzflesh3.spr Solution: Right Click on shortcut Counter Strike and Select Properties. Click on the folder Open location of the file folder will open where the game Counter Strike is installed, now in this file search folder that gives the error. in the example above, the cause of the error was the muzzflesh3.spr file. When you get a file just delete it. Now start Counter Strike and try to connect the server again. You can get the same bug again, but this time for some other file sprites. For example, first you got an error for muzzflesh3.spr file, this time you can get for muzzflesh2.spr and then again for muzzflesh1.spr. So you may need to repeat the same process 4-5 times.
